Account Requirements

General information is displayed about which parts of your account need to be updated.

By clicking the “Next Step” button, you will be guided through all necessary steps.
Acceptable Usage Policy

Sign the Acceptable Usage Policy by selecting the “Accept” radio button and clicking the “Submit” button.
Midas Training
Take all required Midas training courses. The number of courses depends on your role within the university (faculty, staff or student). Read the pages carefully and click the “next” button to continue. At the end of a course click the “Accept” button.
Required MIDAS Training

Certification of Training

Congratulations!
You have completed the 2009 Information Technology Security Awareness Training. Depending on your role and access requirements, additional training may be required and will be presented next.

Accept or Decline
Clicking on the 'Accept' button indicates that you certify that you have read and understand the materials presented in this training and that you accept the responsibilities associated with using these assets. Continued use of the IT assets of Old Dominion University requires this acceptance.

Clicking on the 'Decline' button indicates that you have not read, do not understand and/or do not accept the responsibilities presented in this training material. You will then NOT qualify for continued use of these IT assets.

previous next Decline Accept
Password

Update your Midas password by typing in a new password twice. The password must follow certain rules to be valid as a MIDAS password. These rules ensure the security of your password and are listed in the grey box on the right-hand side of your screen. You will see a progress bar that indicates if all the password rules are complied with. The rules themselves change style once you comply with them, so you can adapt your new password accordingly. Click the “Change Password” button.
**MIDAS PIN**

To make your account more secure, enter a 6-digit PIN number. Rules for the pin are in the gray box on the right-hand side of the screen. Click the “Set Pin” button.
Security Profile

The Security Profile is necessary to protect your privacy and the security of the network if you should forget your password. The setup consists of 3 steps.

In step 1 you choose a security token method. You have to choose at least one of them, but you can also choose multiple or all methods. Click the “Continue” button.
Step 2 requires you choose a verification method. You have 2 choices: a text-based method or a color-based method. Move your mouse pointer over the choice names to see examples. Click the “Continue” button to go on.

Depending on what you chose in step 2, the last step for the security profile is either the “Questions and Answers” profile or the “Color Grid Pattern” profile.
Questions and Answers profile
Please select 2 of the predefined questions and answer them. Make sure you select questions which you
can answer in a unique fashion. Enter answers that you are able to recollect even months after the
initial setup date. Click on “Submit Profile” when you’re finished.
Color Grid Pattern Profile
The Color Grid Pattern is intended for visually inclined people. Please follow the instructions on the page and click “Submit” when you’re done.
Account Information Page

Back on the Account Information page, you see that your account has been updated. All the requirements that have been fulfilled are indicated by a green checkmark. Your Midas account is fully functional now.

To log out of MIDAS, click on “Log out of MIDAS” on the left side of the screen.

Please call the Help Desk at (757) 683-3192 or email ocshelp@odu.edu if you have any questions.
